1. Overview

SYU Sri Lanka is a Flutter membership application for the State Youth Union. Members register, complete a profile wizard, read news, RSVP to events, and chat. Staff admins manage members by district and DS division, publish content, and provision accounts.

Backend platform: Supabase (Auth, Postgres with Row Level Security, Storage, Realtime, Edge Functions). Clients use the anon key only; privileged actions (OTP mail, admin create member/staff) run in Edge Functions with the service role.

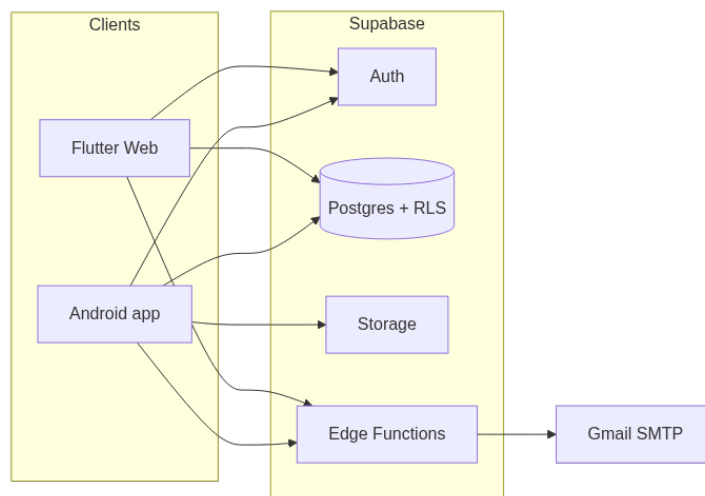

Figure 1.1: System context

2. Architecture and roles

Member — self-service profile, news, events, chat.

Division admin — members in a DS division; WhatsApp group link; add members.

District admin — members in a district; create division admins; organizers.

Super admin — national tools: publish news/events, broadcast, clubs, staff admins (reference: admin@syu.lk).

Authorization is enforced in Postgres RLS. Staff UI is gated by `is_staff_admin()` (super district division).

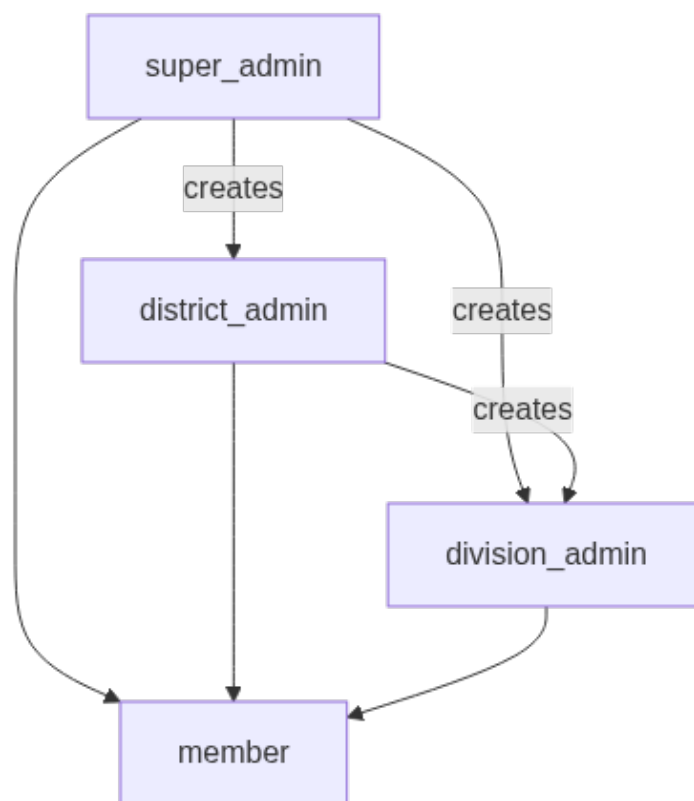

Figure 2.1: Role hierarchy

3. Guest entry — splash, login, register

Cold start shows the brand splash, then login. Guests create an account with name, email, and password. After sign-up the app sends a six-digit OTP via Edge Function send-app-otp (Gmail SMTP in app_mail_settings), bypassing Supabase Auth email quotas.

Text paths (no screenshot): Confirm email at /confirm-email; Forgot password at /forgot-password; Force password change for admin-provisioned users at /force-password; Suspended accounts are blocked at login.

4. Member experience

After login, members see the home hub (RISE TOGETHER), completeness banner when NIC/location/etc. are missing, and shortcuts to news and events.

Registration wizard collects personal data, location (district → DS → GN), youth club, and qualifications. News and Events tabs list published items for audience all (or scoped to the member's location).

Text paths: Settings → language / notifications; Edit profile; Chat inbox → open thread; Notification center; RSVP Going on an event.

5. Staff administration

Staff land on an admin dashboard with tiles for Members, Saved, Chat, Broadcast, News, Events, District & DN admins, Organizers, and (for division admins) WhatsApp group link.

Add member provisions Auth + profile and emails a temporary password (force password change on first login). Publish news/events with audience ALL or district/DS/GN and optional notify.

Staff Admins: Super admin creates district and division admins; district admin creates division admins only.

Text paths: Member row actions (note / suspend / save); Broadcast; Admin chat; Youth clubs; Audit; Reports; Change email while force-password pending.

The screenshot shows a mobile app interface for creating an announcement. At the top, there's a header bar with a back arrow, the title 'News', and a 'Dashboard' link. Below the header, it says '0 news' and has a '+ Create' button. The main content area is a large grey rectangle with the text 'No announcements yet.' in the center. Below this, there's a horizontal line separator. The 'Create announcement' section follows, featuring a 'Title' input field, a larger 'Body' text area, a 'Send to' dropdown menu with 'Audience' as a hint and 'ALL members' selected, a 'Notify matching members' toggle switch which is turned on, and a prominent red 'Publish' button at the bottom.

6. Flow catalogue summary

The repository documents thirty-four flows (F-01...F-34) in docs/SCREENSHOT_GUIDE.md. Fifteen require screenshots (this document); the remainder are described as text paths (OTP confirm, forgot password, edit profile, chat thread, broadcast, clubs, audit, etc.).

Use cases UC-01...UC-22 and Mermaid sources also live in docs/USE_CASES.md and docs/ARCHITECTURE.md.
